

## **The Creative Camera and the Digital Darkroom**

**6 Weeks**

**18 Hours**

Workshop will focus on composition, the art of picture taking and image enhancement. Participants will need digital cameras, cell phones or tablets to take pictures and Adobe Photoshop Lightroom photo-editing software. Karen will show examples of her photographs and share the way she sees the world through her viewfinder, give suggestions on composing shots and working with available light. Different ways to set digital cameras and phone and tablet cameras will be discussed. Participants will be shown easy ways to select and store images. Using Lightroom Library module participants will learn about file handling, importing, sorting and exporting. Lightroom's Develop module will be explored in order for participants to create artistic photographs.
