

PHOTOART

Workshops with Karen Dolan

It's All About the Image

8 Weeks

24 Hours

Workshop is for photographers who wish to push their creative potential and expand their understanding of digital photography.

Participants will need digital SLR cameras and Adobe Photoshop Lightroom photo-editing software.

With examples of her work Karen will demonstrate the importance of composition and design in photography, share the way she sees the world through her viewfinder, give suggestions on composing shots, camera settings and working with available light.

Participants will be shown easy ways to download, select and store images.

Using Lightroom's Library and Develop modules participants will learn about file handling, importing, sorting, exporting, basic and advanced post processing techniques.

Participants will refine their creative skills and design more artistic compositions.
